

Amalega Odafe Anthony

AI Enablement & Intelligent Automation

Ibadan, Nigeria | +2349132480302 | odafe.amalega@gmail.com

PROFESSIONAL SUMMARY

AI enablement professional with hands-on experience deploying AI agents, intelligent automation, and workflow systems that deliver measurable operational improvements for real businesses. Has led automation initiatives end-to-end — from identifying the opportunity, to building and deploying the solution, to training staff to use it independently. Comfortable working across both technical and non-technical teams, and experienced with the full spectrum of AI deployment approaches: cloud-hosted, local/private, and hybrid. Focused on practical impact over theory.

KEY SKILLS

AI Agents & Automation: CrewAI, n8n, Make.com, Zapier, Claude Code, Google Antigravity, Open Interpreter, OpenAI Codex

LLM Deployment: Ollama (local models), GCP, AWS, self-hosted AI infrastructure

Business Systems: Odoo ERP, PostgreSQL, MySQL, MongoDB, Nginx, Caddy

Automation Tools: UiPath, UI.vision, Python scripting, Excel/Sheets automation

Enablement: Staff training on AI tools, technical documentation, process documentation

WORK EXPERIENCE

AI Automation Specialist & ERP Implementor | *Self-Employed (Freelance)* Dec 2025 – Present

- Deployed intelligent automation workflows (n8n, Make.com, Zapier) for SME clients, replacing manual administrative processes and reducing operational errors — delivered as complete, production-ready solutions.
- Built and configured AI agent pipelines using CrewAI and Open Interpreter, automating multi-step business tasks that previously required manual coordination.
- Deployed local LLM environments (Ollama) and cloud-hosted AI infrastructure (GCP, AWS) for clients requiring private or scalable AI solutions.
- Implemented and configured Odoo ERP for restaurant and retail clients; integrated business operations modules and trained staff on day-to-day use.
- Delivered training sessions and documentation enabling non-technical staff to independently operate newly deployed automation systems.

Administrative IT Personnel & Technology Teacher | *New Edition International Schools*

2022 – 2025

Part-time during university studies; full-time 2024–2025 following NYSC completion

- Led the institution's first automation initiative — deployed RPA tools (UiPath, UI.vision) to eliminate repetitive document-preparation tasks across administrative workflows.
- Trained administrative staff to independently operate the deployed tools, creating a sustainable internal adoption model — directly replicable at organisational scale.
- Integrated AI tools (NotebookLM) into teaching workflows; student cohort achieved approximately 50% scoring above 80 in assessments.
- Maintained all institutional records and compliance documentation under strict accuracy standards and tight deadlines.

SELECTED AI PROJECTS

AI Civic Tools — Tax Filing & Transport Voucher System | *Gamma Labs* 2026

- Contributed to scope definition and agentic workflow architecture for two AI-powered civic automation tools, applying LLM integration principles to document-heavy public-sector processes.

Multi-Agent & LLM Exploration Projects | *Personal / Hobbyist* 2024 – Present

- Built multi-agent pipelines with CrewAI; worked with Claude Code and Google Antigravity for agentic coding and task automation; deployed and tested local open-weight models via Ollama for private inference use cases.

EDUCATION & CERTIFICATIONS

B.Eng. Mechanical Engineering — Federal University Oye-Ekiti (FUOYE) — Second Class Lower — 2023

- HNG Internship — No-Code Workflow Automation Track (n8n, Zapier, Make.com)
- Virtual Assistant Certification — ALX Africa (2024)
- Software Engineering — Tech4Dev
