

AMALEGA, ODAFE ANTHONY

Ibadan, Oyo State, Nigeria • +234 814 879 4458 • odafe.amalega@gmail.com • linkedin.com/in/odafe-amalega
AI Automation Engineer • n8n | Make.com | Zapier • API Integration • CRM & Business Process Automation

PROFESSIONAL SUMMARY

Builds no-code automations for small businesses that don't have an in-house IT team — n8n, Make, and Zapier workflows currently running for clients like SpiceCrib Restaurant, alongside full Odoo ERP setups handling inventory and accounting for restaurant and retail operations. Self-taught across everything on this CV, from n8n to UiPath to Python, usually by picking a real problem and building the fix for it. Has also spent several years teaching technology to school students and non-technical staff, so the automations tend to come with instructions people can actually follow after handover.

CORE COMPETENCIES

Automation Platforms: n8n, Make.com, Zapier, UiPath, UI.vision (RPA)

API & Integration: No-code API connections, webhook integration, database hooks, multi-step and conditional workflow logic

CRM & Business Process Automation: Odoo ERP implementation (inventory, accounting, operations), order management and client onboarding workflows, error handling

Data & Reporting: Google Sheets / Excel automation, PostgreSQL, MySQL, MongoDB, large-scale data pipelines (700K+ records), Python scripting

Delivery & Enablement: Process mapping, technical documentation, staff/end-user training, plain-language communication of technical concepts

EXPERIENCE

Self-Employed | *Freelance Automation Specialist & ERP Implementor*

Jan 2025 – Present

- Design and deploy end-to-end business process automations for SME clients (including SpiceCrib Restaurant) using n8n, Make.com, and Zapier — covering order management, CRM and customer notifications, API integrations, data routing, and reporting.
- Implement and configure Odoo ERP/CRM for restaurant and retail clients, handling full setup of inventory, accounting, and operations modules.
- Deliver hands-on training to client staff on newly implemented systems, translating complex no-code workflow logic into plain-language instructions non-technical users can follow confidently.
- Develop training materials, walkthroughs, and reference guides as part of every client engagement.
- Build and maintain relational (PostgreSQL, MySQL) and NoSQL (MongoDB) databases, plus Google Sheets/Excel reporting layers, as the data backbone for client automation pipelines.

HNG Internship | *No-Code Automation Track Participant*

2024

- Completed Stage 5 of the HNG Internship with a focus on no-code workflow automation, working with n8n, Make.com, and Zapier in a structured, project-based learning environment.
- Gained direct exposure to how automation tools are taught and adopted in a cohort setting, sharpening a practical, user-centred approach to building and explaining workflows.

New Edition International Schools | *Technology Teacher & IT Trainer — 2nd Stint*

Mid-2024 – Dec 2024

- Resumed technology instruction and IT support role after completing NYSC service, continuing curriculum delivery and staff training responsibilities.
- Expanded use of automation tools within the school's administrative operations, building on systems introduced during the first stint.

Dangote Cement PLC, Ibese Plant | *NYSC Trainee*

Sept 2023 – June 2024

- Completed mandatory national service in a large industrial institution, developing professional discipline, cross-departmental communication skills, and familiarity with structured operational workflows at scale.

Easit Technologies Limited | *Beta Tester & UX Writer*

2023

- Delivered structured usability feedback that directly shaped product improvements; wrote user-facing copy for multiple app interfaces, demonstrating the ability to communicate technical concepts clearly to end users.

Deevamart / Flogram | *Automation & Research Consultant*

2023 – 2024

- Built automated research workflows combining OSINT techniques and no-code tools to generate and verify 100+ qualified leads.
- Advised on and implemented social media automation for brand management, integrating scheduling and engagement tools into client workflows.

New Edition International Schools | *Technology Teacher & IT Trainer — 1st Stint*

2021 – 2023

- Designed and delivered Basic Technology curriculum to students from scratch, refining materials based on assessment results; cohort achieved approximately 50% scoring above 80.
- Introduced and deployed UiPath and UI.vision RPA automation to replace repetitive administrative document workflows, then trained staff to operate the tools independently.
- Adapted teaching style to suit learners at different levels, from complete beginners to moderately experienced staff.
- Produced structured documentation and guides to support ongoing staff use of new systems after training concluded.

DBot / Tradder.ai | *Personal Project: Automation Developer & Data Analyst*

2022 – 2024

- Built an automated data pipeline processing over 700,000 rows of broker data using UiPath-driven scraping, cloud virtual machines, and Excel automation scripts.
- Applied no-code and low-code tools alongside Python scripting to clean, validate, and analyse large datasets for a live trading application, demonstrating automation at real production scale.

EDUCATION & CERTIFICATIONS

Federal University Oye-Ekiti (FUOYE) | *B.Eng. Mechanical Engineering (2:2, CGPA 3.22/5.00)*

2018 – 2023

- HNG Internship, No-Code Automation Track (Stage 5 completion) — 2024
- Virtual Assistant Training, ALX Africa — Oct 2024
- Software Engineering, Tech4Dev
- Intermediate Soft Skills, Jobberman Nigeria
- Self-Taught: n8n, Make.com, Zapier, UiPath, UI.vision, PostgreSQL, MySQL, MongoDB, Odoo, Python scripting
